ABOUT ME

I'm an aspiring **full-stack web-developer**, and I have experienced working with both **front-end** and **back-end** programming.

I find myself to be **passionate** towards developing websites. I love the challenges that come along the way and finding ways to make it as **elegant** and as **efficient** as possible.

I aim to be a **valuable asset** to myself, to my clients, and to my team members. I am most **confident** in my ability to work with JavaScript and its ecosystem, and in my **ability to learn** new languages, frameworks and libraries if and when necessary.

EDUCATION

iAcademy - BSIT

2018 - present (College)

Began building systems and websites with real-world application as courses required it.

Started expanding my knowledge by learning existing technologies, libraries and frameworks, and using them to build practice projects in my spare time.

De La Salle University - BSIT / BSCE

2014 - 2018 (College)

Solidified my foundational knowledge for programming in my 1 year of being an IT student.

Philippine Chen Kuang High School

2004 - 2014 (Grade School to High School)

Computer subjects started becoming my favorite.

Got exposed to programming and began aspiring to be a programmer.
